CHADBOURNE TAKING PART IN FORESTRY DISCUSSION AT FARM AND HOME WEEK

A panel discussion on logging and milling is the principal part of the forestry program arranged for March 25 at the Farm and Home program at the University of Maine. Taking part in the discussion are J. G. Deering, Biddeford; H. W. Worthen, Bangor; Philip Chadbourne, Bethel; and Gregory Baker, U. of M.

"THERE ISN'T ANY MORE" RUBBER FOR CIVILIANS

"It is extremely important that every citizen understand our situation in rubber," declared Donald M. Nelson, chairman of the War Production Board, and Jesse Jones, Secretary of Commerce in a joint session last week.

"We cannot win the war unless our military forces have an ample supply of rubber. If the rubber is lacking our planes can't fly, our tanks can't move, our field guns can't operate, our warships can't function," they said.

Summarizing the loss through Japanese seizure of former sources of crude rubber, Nelson and Jones pointed out that the present U. S. stockpiles, plus rubber now on its way here, plus synthetics which will eventually be made in the United States is the total supply which may be counted on at this time. They stressed the fact, according to the Regional Information Office, OEM, Boston, that this supply is sufficient only for military needs, that only the bare essentials of civilian use may be permitted.

"Everyone of us who is used to riding on rubber without giving the supply a thought should look at his tires and say—'That's all there is. There isn't any more.'—and proceed accordingly until adequate supplies are once more assured."

AT THE METHODIST CHURCH

The Methodist Church is closing the year. The Annual Conference meets at Waterville April 22. The church year has been prosperous and the congregations have been good, and the various activities of the church have been well attended. The church appreciates the help of its many friends. It is the desire to have all finances paid by Easter Sunday, April 5. Letters and envelopes are going out for all who wish to help

ALLEN'S SHOE STORE SOLD

The stock and fixtures of Allen's Shoe Store have been bought by the Purinton Shoe Store of Portland, and a sale will be conducted here by Mr. Taylor of Portland beginning Friday morning.

Mr. Allen has made no definite plans for the future.

ENGAGEMENT

Mr. and Mrs. L. W. Hathaway of Bryant Pond wish to announce the engagement of their daughter, Beatrice, to Fred S. Judkins.

Miss Hathaway, who is a Valedictorian of the 1940 class at Woodstock High School, is now an honor student at Farmington Normal School. She is also prominent in extra-curricular activities.

Mr. Judkins, the son of Mr. and Mrs. Cedric Judkins of Upton, graduated from Gould Academy in the class of 1932 and the University of Maine in 1938. He is at present serving his country with the 240 C. A. C. at Fort Levee in Portland Harbor.

Both have been very active in Grange work. Mr. Judkins having served as Master of Upton Grange for two years previous to his call to the army. After the war the couple plan to settle on the farm which Mr. Judkins owns in Upton.

GOULD HONOR PARTS

The Headmaster of Gould Academy announced the honor parts for 1942 at chapel exercises, Tuesday morning. Four members of the present senior class of 53 members have maintained an average above 90 for their years at Gould Academy.

First honor goes to Fremont Ireland, son of Master and Mrs. Ireland of Bethel; second honor, Miss Herbertina Norton, the daughter of Mr. and Mrs. Eugene Norton of Bethel; third honor to Elmer Runyon, son of Mr. and Mrs. Kenneth Runyon of Plainfield, N. J.

Fremont Ireland has been very active in all school activities since his admittance to high school, first two years having been spent in Newport High School, Newport, Vt. He has taken five full subjects each year except his senior year when he took four subjects plus mechanical drawing, and all four years has not received a grade below 90 with one exception. In addition to this heavy load he has been a member for four years on the football squad, being captain of the team his senior year. Also been a member of the Championship Winter Sports team in both the Vermont and Maine schools, being captain of Gould Academy's team this year. He has occupied some school office in high school each year and has been president of his class his two years at Gould. He has been a member of the school glee club, orchestra, and band all four years, and one of the leads in the Senior Play this year. Last year he made his letter in baseball and this year is attempting to do the same in track. Plans are being made for him to attend Middlebury College next year.

Herbertina Norton has been active in dramatics during her years at Gould. Last year she won third prize in humorous reading at the University of Maine and took part in the Senior Play this year. She has occupied school office for the last two years. She has also been active in sports, being a member of A. A. Council, and for the past two years has been an active member of the Varsity Basketball team. During her third year at school she was awarded the Citizenship medal for girls. She has taken part in both the girls' glee club and the varsity glee club. Miss Norton has been a prominent member of the editorial board the past three years. Herbertina also has not received a grade below 90 with one exception, which is a fine record.

Elmer Runyon has made a remarkable record at Gould in the face of a great physical handicap when he entered school four years ago. His health had never allowed him to go to grade school and he entered Gould on condition. Since then he has improved physically and in his school work. During his years here at school he has been outstanding in track and winter sports. He is captain of this year's track team, holds the Gould record for the hurdles. This last year he has developed rapidly in winter sports, being one of the men to take part in all four skiing events. The last two years he has been a member of the Dormitory council and this year is president of that group in which capacity he has made a very fine record.

Elizabeth Gorman has been another outstanding member of her class. For the last two years she has taken active part on the editorial board. She took part in debating two years and also in the girls' glee club. This year she had the privilege of being in the Senior Play. She has been a prominent student of the Commercial Department throughout her years at Gould.

12-GAUGE SHOTGUNS NOW RESERVED FOR GOVERNMENT USE

Manufacturers of sporting firearms have been ordered to make no further deliveries of 12-gauge shotguns, except to officers of the Federal, State and local governments, for official use, and to governments of the lend-lease countries, according to word received by the Regional Information Office, OEM, Boston.

Purpose of the order is to make available for war plant protection and other local guard duties an adequate supply of shotguns of this gauge. The order also restricts but does not prohibit manufacture of shotguns of other gauges.

Following the restricting order, Price Administrator Leon Henderson asked sporting firearms manufacturers to take steps to prevent advances in prices of rifles and shotguns to levels above those in effect Jan. 10 last. While the letter is directed only to manufacturers, Mr. Henderson pointed out that there is no excuse for retail price advances and that the retail level would be closely watched and further action taken if necessary.

BIRTHDAY PARTIES

Clifford Larson, son of Mr. and Mrs. Carl Larson, was given a party, Wednesday afternoon, in honor of his eighth birthday. Those present were Teddy Chadbourne, Marjorie Rowe and Janice Lord. A birthday cake was enjoyed, after which games were played.

Nancy Van Den Kerckhoven, daughter of Mr. and Mrs. Louis Van Den Kerckhoven, celebrated her eighth birthday, Wednesday, by having the following as supper guests: Lois Ann Van Den Kerckhoven, Joan Conner and Barbara Wilton.

VILLAGE CORPORATION HAS NEW ASSESSORS

The Bethel Village Corporation elected a new board of Assessors and two Park Commissioners Monday evening and re-elected its Clerk, Treasurer and Tax Collector. Ten of the 12 officials chosen rode into office on one ballot with unanimous consent. Exceptions were third Assessor and third Engineer. Assessors Herbert C. Rowe and William C. Chapman would not accept re-election. It was necessary to elect one of the Park Commissioners for two years because of the resignation of Herbert I. Bean. Three of the officials chosen were not present at the meeting.

The appropriation for use of hydrants was increased \$30 to allow for the installation of a hydrant near the Coburn poultry farm on Paradise Hill. The \$300 appropriation for maintenance of the skating rink was granted after a discussion. Ex-Assessor H. R. Rowe admitted there had been little use of the rink during the present season, partly due to the impossibility of freezing the surface in the early winter. He suggested a smaller skating surface and use of part of the money for a gravel coating of part of the rink to encourage earlier freezing. Some of his remarks were contradicted by Patrick O'Brien.

On motion of F. E. Russell it was voted to pass over the matter of employing Police or Night Watchman. The same was done last year.

It was voted to take care of the abatements from the general fund instead of by appropriation.

Under the customary "any other business" article Eugene Van Den Kerckhoven suggested the appointment of a committee to investigate the possibility of dissolving the Corporation. Although action was not possible at the time several spoke on the subject, and a feeling was evident that the Corporation had about outlived its usefulness.

A MATTER OF COMPARISON

"Hold on there!" said I to my daughter last Saturday morning when I saw her getting out the big yellow crock and the wooden spoon and the butter and sugar preparatory to making our Sunday cake. "Perhaps we'd better have ginger bread or fruit for dessert instead. You know there's a shortage of sugar and we've got to go mighty easy."

"But we have been going easy," she reminded me. "No chocolate sauce for our ice cream last night. No candied apples with the pork the other day and never any candy. Besides they say we'll be allowed 77 pounds of sugar for each of us this year and that's quite a lot."

"What do you mean 'quite a lot,'" I asked her. "It's a lot less than we're used to and everybody is

warning us to be careful."

"Well, it all depends on how you look at it," my philo-sophical daughter, now a junior in high school declared. "If you compare it with what we used to have here in the United States when the sky was the limit, it isn't much. But when you compare it with what they ate before the war in other countries, we're still rolling in sugar."

"Do you happen to know how much they did eat in these other countries?" I asked, planning her own.

"It's all in my school notebook. Just wait until I get it." And in another few minutes she was giving me chapter and verse on the world sugar situation. Maybe you'll be as surprised as I was at the actual facts.

It seems that in 1937 and 1938 when things were going along in a fairly normal way the average Frenchman ate only 55 pounds of sugar per year, in spite of all their wonderful little "gateaus" and fancy chocolate concoctions. The Russian ate only 29 pounds per person

and the Poles 28. The Dutch, whom we always thought of as living very well, ate about 64 pounds of sugar each year. In Great Britain they had a much sweeter time with 109 pounds per person, but Australia did even better getting 112 pounds each. But that was still well below the American average.

So, you see it's all a matter of comparison. And Americans in war time live better than many Europeans in the days of peace! We've taken too many of our advantages for granted and too often overlooked the fact that our free industrial system has made us used to a standard of living undreamed of in many lands.

A BOOMING BUSINESS

A WEEK OF THE WAR

The War Production Board said shortages of some materials and man-power were more limiting factors in all-out production than difficulties in obtaining production facilities. The Board reported airplane production, though ahead of schedule, would be more advanced if more materials had been available. Chairman Nelson said he has not "recognized the possibility" that any phase of the production program would fail to meet the goals announced by President Roosevelt.

To speed production Mr. Nelson ordered all war supply contracts to be negotiated instead of determined by competitive bidding. Contracts will be assigned to firms requiring smallest quantities of new equipment to fill orders, he said. The WPB began an inventory of all idle machine tools to make them available for war production.

The WPB said war expenditures reached nearly \$100 million a day, 18 percent greater than in January. RFC disbursements and Treasury checks for war purposes totaled \$2,330 million for the month. The Board announced mass production of tanks making greater use of cast steel and welded hulls has begun. Strip mills that last year made sheet steel for automobile bodies are being converted to manufacture ship plate. The Navy Ordnance Bureau said its contractual obligations increased 49 percent in the two months after Pearl Harbor.

Rationing

Price Administrator Henderson reported United Nations rubber requirements will not allow any rubber for new or recapped tires for non-essential passenger cars. There is not sufficient rubber now to maintain the rate of military production and the most essential civilian needs, he said. To insure maximum durability of tires now being recapped, Mr. Henderson said he is developing minimum standards for grades of recapping material being manufactured. The WPB reported athletic equipment experimenting with reclaimed rubber have developed serviceable squash and tennis balls and are working to develop an all-reclaimed core for baseballs. The WPB Sugar Section began a survey of the sugar situation in all non-Axis countries to find all supplies of sugar available to the United Nations.

The WPB stopped all sales and deliveries of new and used typewriters. Chairman Nelson authorized the Office of Price Administration to ration such typewriters at both wholesale and retail levels. Petroleum Coordinator Ickes said gasoline very likely will be rationed if the war council of the petroleum industry recommends such action.

Civilian Defense

President Roosevelt authorized the OGD to begin placing orders for civilian defense workers' equipment and medical supplies. OGD Director Landis requested civilian officials not to ask OGD Headquarters for equipment because distribution will be based on a priority system established by the War and Navy Departments. Priorities will be based on likelihood of attack, vulnerability, and importance to war production of manufacturing plants in the community.

The House passed and sent to conference a bill providing the War Damage Corporation with a fund of a billion dollars to insure property in the U. S. against damage by enemy attack. Director Landis said regional blackouts are planned for later in the spring, and a New England test blackout probably will be held this month. He announced a plan whereby the 3,600 posts of the Veterans of Foreign Wars will cooperate with local defense councils in civilian mobilization.

The War Front

Gen. MacArthur's small air force sank more than 30,000 tons of Japanese shipping in Subic Bay, resulting in the loss of thousands of enemy soldiers. U. S. forces in operations west of the Gilbert Islands destroyed 16 of a formation of 18 Japanese heavy bombers. U. S. submarines in the Far East torpedoed 19 additional enemy vessels. Enemy U-boats in the Atlantic sank the destroyer Jacob Jones, an ore carrier and two frigates. Gen. Wavell was relieved on command of the United Nations forces in the East Indies to resume as Commander in Chief of India.

War Taxes

Treasury Secretary Morgenthau asked Congress to increase this year's Federal revenue by at least \$7,000 million to reach the \$27 billion goal set by the President in his Budget Message. Mr. Morgenthau recommended income taxes be doubled on incomes below \$10,000 to help raise \$3,200 million. He also recommended increases of \$3 billion in corporation taxes and \$1,340 million in excise taxes. He asked that the national debt limit be raised from \$65 to \$125 billion.

Army Progress

President Roosevelt signed the \$32 billion Fifth Supplemental War Appropriation Bill providing \$23 billion for the Army. Congress completed action on legislation increasing the pay of enlisted men and officers serving outside continental United States. The Senate approved a bill providing clothing and equipment allowances of \$150 for commissioned officers. Secretary Stimson announced formation of the Seventh Armored Division with 10,000 men at Camp

OF ALL THINGS

March, with its rain, wind, and sticky snow. Just what we have waited for all winter. And signs of spring—town meetings' over, and the village folks ride out and throw their rubbish by the roadsides. The roads begin to heave and creakle and every break in the surface grows in size to a great crater in a few hours. We begin to see the wisdom of the continuous road plowing as the ditches seem to open automatically when the longer sunning pushes back the snowbanks. And in the village the people long used to walking in the streets when the sidewalks were covered deep with snow or were slippery for comfort still walk in the streets and cuss when they get splattered by passing cars. I see they had a peaceful revolution and got some new officers for the village Corporation and have begun to talk of cutting out the village government. How times change! Uncle Hiram.

Pol. Let. He said sulfanilamide is now standard equipment for all U. S. troops in combat areas because it is found particularly effective in curing abdominal wounds at Pearl Harbor.

The War Department estimated here a approximately a million Servicemen III-A registrants of whom 153,000 are suitable as prospective officers under the plan calling for four months training in field units and then at least two months in Officer Candidate Schools. The Department said after the March 17 lottery, 55 registrants will be placed in two groups—one of the new and the other of the earlier registrants. Local boards will set ratios between the two groups in calling men for induction. Paragroups to adjust civilian affairs in cases of undue hardship caused by immediate induction will be granted hereafter by the Army and not by local boards.

Air

The Civil Aeronautics Administration reported it has given courses to more than 100,000 pilots since 1933 at an average cost of \$600. The CAA said it also has given several thousand refresher courses to instructors at a cost of \$250 each. The Office of Education said the second set of type of 500,000 model planes being made by American school children for the Army, Navy and civilian defense personnel will be sent local project directors about March 20.

Priorities and Allocations

The WPB ordered manufacture of radios and phonographs for civilian use to be discontinued after April 22, 1942. The industry will manufacture Army Signal Corps equipment and other war production. The Board restricted installations of home and business telephones to save scarce materials.

The Board ordered most women's hosiery manufactured after April 1 to be of rayon instead of silk and nylon. Almost the entire output of cotton duck and teal was allocated to the armed forces. Greater priority assistance was extended for repair and maintenance of essential mine machinery, and for materials and equipment used by commercial air lines.

DAY AND NIGHT SERVICE.

GOULD ACADEMY

Monday night the students and a few parents were entertained by Mr. and Mrs. Theodore Schrieber who were the sixth people to be brought to the school as outstanding entertainers. Mr. and Mrs. Schrieber presented lectures, music, costumes, and life and costumes of Central American countries with special emphasis on Mexico. This was the most entertaining performance we have had this year. Due to the unfavorable weather was received by the smallest audience we have had this year. Both Mr. and Mrs. Schrieber were very much impressed with the facilities here at school and I know that the feeling was mutual.

At the assembly Tuesday in addition to the senior honors for the year, the honor roll for the last marking period was read and the student body was shown a few colored movies made here in the campus last fall by Mr. Kahill of Portland. A two reel movie on the Expansion of the United States was also shown, this later movie is one of a series which we received from the University of Maine Film Library each week. Usually these movies are shown to class room groups in particular fields but this one was a universal appeal and was shown to the whole body.

The Varsity Girls' Basketball squad played their second game with the Alumni Tuesday evening score of 17-13. This makes a game apiece and probably will be settled by a third game to be played in the near future.

The Sophomore boys' basketball team won the Gould Academy Interclass Championship last week when they defeated the Juniors in a play-off game by the score of 17 to 12. Bryant was high scorer for the winners while Torrey did most of the scoring for the losers.

Coach Myers started his baseball prospects working in the cage this week. He has a large squad working out but the experienced players are few.

Coach Bateman is also giving his track prospects daily practice in the cage.

The Field House is a real place of activity with baseball and track men working from 3 to 5 and all the other boys of the school working out in volleyball, badminton, hand ball, squash rackets, and boxing. These boys work in two classes from 3 to 4 and from 4 to 5.

TANKS!

As Narrated by

Orson Welles

In the Defense Film, "Tanks," Produced by the Film Unit of the O.E.M.

TANK ARSENAL

Here in the world's first tank arsenal
We forge the armament of victory;
Here we create the rolling forts of armor
steel—the M-3 medium, fighting tank—

A weapon come of age, taking its proper
place beside the airplane and
the naval vessel as a roaring,
plunging vehicle of death.

BUILDING A TANK

As it begins to take form, moves along
the line, we see its strength develop,
its drive and power flow into
the body... the final drive, built
to withstand the shock of enemy
fire, and smash whatever obstacles
it meets; the power plant, an airplane
engine, hitching the force of
flying horses to the earth so that
this weapon can run swiftly to
attack; the armored turret, destined soon to shelter men
and guns.

We see its claws of steel uncoil, the caterpillar track lie open on
the assembly floor, where the huge body slowly moves to
draw it on...

A machine full grown at last, under its own power ready to roll off
the front of the line, pulling the next tank into the place it left
without a moment's pause...

Firepower! Power from deadly 75s to hurl steel and shrapnel at
the tyrant foe, cannon to make this tank a fearful dreadnought
of destruction.

And still more power! Power from deadly 37s, swinging a complete
circle of raking fire...

TOOLS AND MACHINES

Defense production in factory and arsenal begins far behind the
assembly line...

Defense production starts back on the drafting board and in the
planning room—

Comes out of models, charts, drawings, blueprints and designs—

Springs from the minds and hands of men who have
special kinship with machines.

Here such men have built uncounted numbers
of machines, and put them all to work—
to labor with free men fighting for the
world they cherish;

For these men know production is a line of
battle and know production's battle line
must drive ahead, unbroken.

On this line men work night and day, united
in a solemn purpose.

Production now is not a promise but a fact,
Gigantic, real, a solemn answer and a pledge
beyond recall.

MATERIALS AND PARTS

Here are order, planning and design;
From these vast stockpiles materials
now flow

In such a way that scores of sub-assemblies
reach their proper
place, each at the proper time.

Steel, rubber, aluminum and tin;

Forgings, moldings, castings:
All will flow into the finished weapon.

Ten thousand parts,
Twenty thousand parts,
Thirty thousand parts

—to build one engine of destruction!... picked up in the air
and started toward its destination.

Now the arsenal's task is done,
Now the tanks are combat-ready.

LOADING AND SHIPPING

They are ready for the target. And it will be quickly found, when
ships and their cargoes touch the shores on which embattled
allies stand!

Strong men will see them through. Men of the Navy, men of the
armed merchant marine, will take them to the fighting fronts—

—to Asia

—to Africa

—to the Middle East

and to the ancient fields of Europe!

Strong men will see them through...
Where these ships go, there soon the earth will tremble.

DON'T LACK COOKIES FROM LACK OF SUGAR

New Cookie Threesome

Sweetened with Syrup

The shortage of sugar needn't
mean a shortage of cookies for

your cookie jar. It may be a blessing
instead of distressing. For
cookies with corn and maple syrup
in their makings don't require sugar,
yet they're the chewy kind that
stay fresh a long time and the favorites

of the younger set.

So skip the sugar bowl when you
fill the cookie jar—these three recipes
newly-tested in the Rumford
Kitchens are good-eating reasons
why you can:

Surprises

- 1/2 cup shortening
- 1 cup corn syrup
- 1 egg
- 2 1/2 cups sifted flour
- 1/4 teaspoon salt
- 3 teaspoons all-phosphate baking powder
- 1 teaspoon vanilla
- 3/4 cup chopped raisins

Cream shortening until light
add corn syrup gradually and beat
until smooth. Beat in egg. Sift to-
gether flour, salt and baking pow-
der. Add to creamed shortening
mixture; add vanilla and blend
well. Chill, roll out on floured
board, cut into rounds and top with
chopped raisins. Wet edges slightly,
top with second cookie, and
press down onto first one. Place on
slightly greased cookie sheet and
bake in a moderate oven (375°F) for
12 minutes. Makes about 2 dozen
cookies.

Oatmeal Cookies

- 1/2 cup shortening
- 1 cup maple syrup
- 1 egg
- 1/2 cup milk
- 1 1/2 cups rolled oats
- 3/4 cup chopped raisins
- Grated rind 1 orange
- 1 1/2 cups sifted flour
- 1/4 teaspoon salt
- 3 teaspoons all-phosphate baking powder

Cream shortening; add syrup
and egg and beat until blended.
Add milk, rolled oats, raisins and
grated orange rind. Sift together
flour, salt, and baking powder. Add
to first mixture and blend well.
Drop by teaspoonfuls on greased
cookie sheets. Bake in moderate
oven (375°F) about 12 minutes.
Makes 4 dozen cookies.

Chocolate Bites

- 1/2 cup shortening
- 1/4 cup corn syrup
- 1 small egg
- 1 1/2 cups sifted all-purpose flour
- 3 teaspoons all-phosphate baking powder
- 1/4 teaspoon salt
- 1/2 teaspoon vanilla
- 1/2 cup semi-sweet chocolate, cut
in small pieces
- 1/2 cup chopped nut meats
(optional)

Cream shortening and corn syrup
until light and fluffy. Add egg and
beat well. Sift together flour, bak-
ing powder and salt. Add flour mix-
ture to shortening mixture; add
vanilla and blend well. Fold in
chocolate and nuts. Chill and drop
by teaspoonfuls on a greased cook-
ie sheet. Bake in a moderate oven
(375°F) for 12 minutes. Makes 3
dozen cookies.

Today's popularity
of Doan's Pills, after
many years of world-
wide use, surely must
be accepted as evidence
of satisfactory use.
And favorable public
opinion supports that
of the able physicians
who test the value of
Doan's under exacting
laboratory conditions.
These physicians, too, approve every word
of advertising you read, the objective of
which is only to recommend Doan's Pills
as a good diuretic treatment for disorder
of the kidney function and for relief of
the pain and worry it causes.
If more people were aware of how the
kidneys must constantly remove waste
that cannot stay in the blood without in-
jury to health, there would be better un-
derstanding of why the whole body suffers
when kidneys lag, and diuretic medica-
tion would be more often employed.
Burning, scanty or too frequent urina-
tion sometimes warn of disturbed kidney
function. You may suffer nagging back-
ache, persistent headache, attacks of dis-
eases, getting up nights, swelling, puffi-
ness under the eyes—feel weak, nervous,
all played out.
Use Doan's Pills. It is better to rely on
a medicine that has won world-wide ac-
claim than on something less favorably
known. Ask your neighbor!

NEW ENGLAND MILKING SHORTHORN COW MAKES SENSATIONAL RECORD. Natick Lassie Clay (above), 13-year-old cow in the purebred Milking Shorthorn herd of Natick Farms of Natick, R. I., recently completed the sensational record of 21,547 pounds of milk and 706.68 pounds of butterfat. This eclipses, according to the Milking Shorthorn Society, Chicago, Ill., all former records for the breed in the United States and Canada for cows of her age. Natick Lassie Clay was nearly 12 years old when she finished her record a few weeks ago.
